

Information Control

With SAP NetWeaver® Business Intelligence (SAP NetWeaver BI), SAP NetWeaver Master Data Management (SAP NetWeaver MDM), and Business Objects offerings, SAP has an immense offering of information management (IM) tools. As a customer, you are faced with a variety of possibilities to benefit from this Portfolio, but also forced to take strategic decisions on how to protect your current investment, and how to get the maximal benefit of your future investments.

Questions you may ask yourself:

- How do I get started, and how what roadmap should I follow to get the best out of the Reporting & Analysis possibilities that SAP and Business Objects provide?
- How should I build a solid Information Architecture, that assures me an adequate Data quality and provides agility to fulfill future information needs?
- How is the Information Management Maturity in my organization, and what is the natural next step for me to take, to maximize the ROI of my BI investments?
- How can my Performance Management benefit from the new tools like Business Planning and Consolidation (BPC), Profit and cost management (PCM), and SAP® software for strategy management?

At Platon, we often assist our customers in finding the right answers to questions like these. With our vast experience in IM advisory services and implementation of IM tools for SAP NetWeaver and Business Objects, we feel confident that we can help you get in control of your SAP and Business Objects Information Management Initiatives.

About Platon:

Platon was founded in Denmark in 1999 by a small group of consultants with a great belief in a growing need in the market for Data Warehousing solutions.
